 - ६) पोलीस महासंचालनालयाचे पत्र क्र.पोमसं/१८/३०/२००५/गणवेष साहित्य, दि. १३.९.२००७.

प्रस्तावना

मुंबई पोलीस नियमावली, १९५९ च्या खंड-१ व खंड-२ च्या परिशिष्ट-३ मध्ये पोलीस अधिकारी व कर्मचाऱ्यांसाठी गणवेष विहित करण्यात आलेला आहे. मुंबई पोलीस कायदा, १९५९ च्या कलम ३ मध्ये विहित केल्यानुसार एक पोलीसदल असे कायदेशीर तत्व प्रतीत होण्याच्या उंदेशाने बृहन्मुंबई पोलीस दल व मुफस्सल पोलीस दल यांच्या गणवेषातील फरक दूर करून एकसारखा गणवेष शासन निर्णय, दिनांक २९.३.१९७९ अन्वये विहित करण्यात आला. शासन निर्णय, दिनांक ३१.८.१९८२ अन्वये राज्याच्या पोलीस दलातील महिला पोलीस अधिकारी व पोलीसदलासाठी असलेल्या गणवेषामध्ये बदल करण्यात आला व शासन निर्णय दिनांक ३०.६.१९८८ अन्वये महिला पोलीस शिपाईदल यांच्या गणवेषामध्ये किरकोळ बदल करण्यात आला. उपरोक्त मुंबई पोलीस नियमावली व शासन निर्णयांद्वारे विहित केलेल्या पोलीस गणवेषाच्या एकूण १०७ बाबी मंजूर आहेत.

पोलीस शिपाईदलाच्या सध्याच्या गणवेषाच्या बाबी व्याच कालावधीपूर्वी विहित केलेल्या आहेत. त्यामध्ये बदलत्वा परिस्थितीनुसार तसेच कायदा व सुव्यवस्थेचा प्रश्न हाताळाऱ्याच्या पृष्ठतीमध्ये झालेल्या बदलाअनुरूप काही बाबी निरुपयोगी ठरलेल्या आहेत, काहीमध्ये बदल करणे तर काही नवीन बाबीचा समवेश करणे गरजेचे असल्याचे निर्दर्शनास आल्यानंतर पोलीस महासंचालनालयाने प्रत्येक बाबीची गरज, त्यामध्ये आवश्यक असलेला बदल किंवा तिचे निरुपयोगी ठरणे यावर अभ्यास करून गणवेषामध्ये बदल करण्यासाठी केलेला प्रस्ताव शासनाच्या विचाराधीन होता.

शासन निर्णय

पोलीस महासंचालकांनी राज्याच्या पोलीस दलातील पोलीस शिपाई ते सहाय्यक पोलीस उप निरीक्षक यांच्या गणवेष, गणवेष साहित्य व कीट सरंजामात बदल करण्याच्या सादर केलेल्या प्रस्तावाचा विचार करून शासनाने पुढीलप्रमाणे निर्णय घेतला आहे:-

- १) सध्या अस्तित्वात असलेल्या गणवेषाच्या एकूण १०७ बाबीपैकी ;
 - अ) सोबतच्या जोडपत्र-१ मधील ४७ बाबी रद्द करण्यात येत आहेत.
 - ब) सोबतच्या जोडपत्र-२ मध्ये नमूद केल्यानुसार ३२ बाबीमध्ये अंशात: बदल करण्यात येत आहे.
 - क) सोबतच्या जोडपत्र-३ मधील १४ बाबीमध्ये कोणताही बदल न करता त्या तशाच पुढे चालू ठेवण्यात येत आहेत.

२) सोबतच्या जोडपत्र-४ मध्ये नमूद केल्यानुसार गणवेशाच्या १० बाबींचा नव्याने समावेश करण्यात येत आहे. या शासन निर्णयासोबतच्या अंतिमत: मान्य राहणा-या गणवेषाच्या ५६ बाबी, त्यांचे प्रभाण व त्यांच्या पोलीस महासंचालनालयाचे विहित केलेल्या विर्निदिष्ट परिशिष्ट -१ मध्ये नमूद केल्याप्रमाणे राहतील.

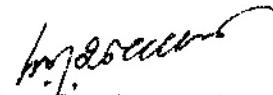

२. या शासन निर्णयासोबतच्या जोडपत्र-१ ने ४ मधील गणवेशाच्या बाबी, त्यांचे प्रभाण व विर्निदिष्ट यांचा पोलीस महासंचालकांनी दुरुस्ती चिड्युद्वारे पोलीस नियमावलीमध्ये समावेश करावा.

३. सध्या देण्यात आलेल्या गणवेशाच्या बाबींचा विहित कालावधी संपत्त्यानंतर त्यापुढील कालावधीत त्या या शासन निर्णयाद्वारे विहित केल्यानुसार देय राहतील.

४. सदर शासन निर्णय, वित्त विभागाच्या अनौपचारिक संदर्भ क्र.सीआर-२७४/०९/व्यय-७, दिनांक ११.१०.२००७ अन्वये दिलेल्या मान्यतेने निर्गमित करण्यात येत आहे.

५. सदर शासन निर्णय राज्य शासनाच्या वेबसाईटवर उपलब्ध करण्यात आला. असून त्याचा संगणक संकेतांक क्र.२००८०२२८१४८४२००१ असा आहे.

महाराष्ट्राचे राज्यपाल यांच्या आदेशानुसार व नावाने,

(सचिन शिवदास)
सह सचिव, गृह विभाग, महाराष्ट्र शासन.

प्रति,

पोलीस महासंचालक, महाराष्ट्र राज्य, मुंबई.

Requirements

6) Shape and design :
Canvas shoe with lace on broad toe last of g/h fitting
for genits.

Colour dark brown close to the shade of the
displayed.

7) Soling pattern :

The soling shall not included continuous lateral tread
patterns or any other features, such as sharp
corners at the base of sole pattern, which may
accelerate or cause premature crack formation.
The design should be such that the sole will have
adequate skid resistance with clear height of min. 2
mm. the sole should be of cup/bucket type.
The sole will be formed by direct injection process
on the lasted upper.

8) Hardness:

The hardness shall be 55 to 75 shore A/ IHD
relative density of sholing material the relative density
of the material after moulding shall be between 0.7
to 0.85 gm per cc. bond strength
upper/outside bond strength – the bond strength
when tested as per is 15298 shall not be less than 3
n/mm

| 4) | It should be provided with tugs, buckles (size 1 inch) made of brass. | | | |
| 5) | The web anklet should be stitched with black colored nylon thread of good quality & strength. | | | |
| 6) | The web anklet should be supported by 2 mm EVA thermacol sheet of black / gray colour between the basic fabric & lining. | | | |
| 7) | Male & female velcro of 2 inches width & 13.5 cm in length should be provided at the two sides. | | | |
| 8) | These web anklet should also be fitted with two side buckles (brass) of 16 gauge thickness 2.5 cm X 2.2 cm size & two straps made out of polypropylene material 12 mm wide (approx) & 12.5 cm in length with brass tugs at the ends to be stitched with the web anklet. | | | |
| 9) | The finished web anklet should be exactly similar to the approved tender sample. | | | |
| 46 | Kit Box | 1 per person | 15 years | Steel trunk large size as per IS 7275 : 1973 with amdt. 1. |
| | | | | 1) Outside colour black oil paint. 2) Inside colour white 3) Additional bushings at the bottom & the weight of the kit box should be 11 200 kgs length 675 mm, width 370 mm & height 330 mm. |
| 47 | Air Bag | 1 per person | 5 years | Air bag should be made by cloth 1200 " 1200 dourum metty rexine or better material available with colour off Navy blue/ medican blue. 1. Length 53 cm 2. Width 26 cm 3. Height 30 cm 4. Round Zip-open tabla – as required for above dimensions. 5. The Maharashtra Police emblem printed on the middle of the front side-pocket. 6. Bottom of the Bag. |

| | | | | | |
|----|-------------------------|-----------------|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| | | | | (a) Plywood 6 mm (Marine ply) Free. (b) length – 48 cm (c) Width – 8 to 9" 7. Inside pocket partition – Matty 600 " 600 dorium – 10-11" length and 8.5 to 9.5" width 8. Bag should have P.V.C. wire of 9mm thickness 9. Shoulder strap length 41 to 43", nylon, 1-1/4" broad and 2 mm thick matching navy blue. 10. All zips should be TCOY or YKK or TONY standard brand. 11. All hooks adjustment buckle of stainless steel. 12. Bottom pad (external) – round, stitched fitting HDPE 13. Thread quality for stitching – 3 ply for industrial use. 14. PVC pipe for the straps. 15. Two additional back straps. (28" two belt) four(4) S.R. pushing lock 1- 1/4" | SRPF, SAG, and Policemen of Naxal affected district. |
| 48 | Haversack (Pittoo) | 1 per person | 3 years | Nylon/ synthetic / polyester cloth pittoo with design of the disruptive pattern and colour / shade : (i. e. Khaki OG/ camouflage shade). The material used in manufacture of the haversack would be conform fully to IS specification. | |
| 49 | Water Bottle | 1 per person | According to wear | 1) Shape : shape of water bottle 'v' / truncated cone type with slight curve shall be provided. 2) Capacity : 1000 ml \pm 5%. 3) Material : to be manufactured from virgin grade mixture of LLDPE 80% & HDPE blow moulding 20%. colours and additives to be added should be of food grade only. 4) Dimensions : height over all : 210mm \pm 5 mm width top : 130mm \pm 5 mm width bottom : 105mm \pm 5 mm wall thickness : front & rear wall 2.45 mm \pm 5 % Side wall 1.4 mm \pm 5 % 5) Neck : neck shape and pattern to be as per indent sample. 6) Cap strap : cap strap shall be intact and rotate | |

- freely on neck.
- 7) Cap : shall be manufactured from virgin grade polypropylene and have two complete threads with 4 mm pitch to prevent leakage of water.
 - 8) Weight : 205 gram \pm 5%.
 - 9) Finish : the workmanship and finishing to be free from any manufacturing defects like flush, appearance, sharp corners etc. metal cavity. The shape and size of the metal cavity shall be made / provided as per the approved sample.
 - 10) Material : it shall be made of single piece deep drawn aluminium.
 - i) Thickness : 1.2mm \pm 5%.
 - ii) Weight : 185 gms \pm 5%.
 - iii) Handles: 2 foldable handles to be provided on the rear wall.
 - 11) Finish : the workmanship and finishing to be free from any manufacturing defects like flush, appearance, sharp corners, etc.
 - 12) Fabric : outer layer to be stitched from PU coated polyester cloth & inner layer to be stitched from water & heat resistant smooth fabric.
 - 13) Bag : to be provided with 2 flaps with 2 press fit buttons. Outer end to be covered and stitched from nylon webbing material.
 - 14) Bag belt mounting to be stitched on the back and to be made from nylon webbing material of 50 mm width x 1.2 mm thick. length to be of 100 mm with 2 ports for fitting of m.s. slides. m.s. guides/slides shall be made with black powder coating. The cold water stored in the water bottle should not lose more than 5°C in a hour in normal room temperature.

| | | | | | |
|----|-----------------------------------|-----------------|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|
| 50 | Carpet (Sataranje / Dari) | 1 per person | 5 years | The carpet should be of the Size of 3 ft. X 6 ft., Without tassels navy blue colour | All Constabulary |
| 51 | Ground Sheet | 1 per person | 3 years | Ground sheet (water proof) :- (A) Length (cm) 2 mtrs. IS-7016-Pt I (B) Width (cm) 115 min IS-7016-Pt I (C) Mass of finished fabric 350 +/- 25gm IS-7016 – Pt I Gm/m2 | SRPF men |
| 52 | Tiffin Box | 1 per person | 4 years | Made of food grade stainless steel metal quality with four round shaped containers. The size of the containers and other details should be as under :- 1) Height of tiffin box 2) Height of four containers 3) Height of bottom plate 4) Height of container from outside 5) Height of container from inside 6) Inside diameter of container 7) Outside diameter of container 8) Height of patty from top container 9) Width of patty 10) Weight of tiffin box 11) Gauge of sheet (Steel) The tiffin box should be embossed or engraved with Maharashtra Police name & logo on it. | SRPF men & Recruits |
| 53 | Sleeping Bag | 1 per person | 2 years | 1) The navy blue shade cloth of sleeping bag should be waterproof. 2) Bag should be light weight and packed with zip around so it can be easily kept into the pittoos. 3) Specification :- Light weight 4) Fabric :- The shell should be water- resistant of 190T washable polyester fabric / or better material | Constabulary of Naxal affected area & S.A.G. |

| | | | | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--------------|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| | | | | available in navy blue or dark blue colour | |
| 5) Measurement:- Sleeping bag "A" :- Length 180 cm, width 150 cm, head support 30cm, "75cm.(attached with the sleeping bag head support to have zip so as cover the head portion) weight 1200 gms with weight of the crimped synthetic staple fibre. | | | | 5) Measurement:- Sleeping bag "A" :- Length 180 cm, width 150 cm, head support 30cm, "75cm.(attached with the sleeping bag head support to have zip so as cover the head portion) weight 1200 gms with weight of the crimped synthetic staple fibre. | All constabulary |
| 54 | Mosquito net | 1 per person | 2 years | The net should be made by nylon or cotton material. The dimension of mosquito nets shall be; length -198 + 5 cms, width 107 + 3cm, height 147 ± 4 cms B. The details of materials used be as under :- a) Netting used for manufacture of mosquito nets shall conform to DGQA prov. specification No. D/42/1/99/TC 11 (a) b) Polyester sewing thread of matching shade. | All constabulary |
| 55 | Blanket Dark Blue | 1 per person | 5 years | Woolen / polyester blended. Colour should by navy blue. There should be a printed monogram of Maharashtra Police on bottom side. Size should be 7' X 4'. weight of the blanket should be 800 to 1100 gms. | All Constabulary |

| | | | | | |
|----|-------|--------------|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| 56 | Lathi | 1 per person | 5 years | <p>1) Thickness minimum 4mm variation + 0.5mm.</p> <p>2) Material: - G.E. lexan polycarbonate, fresh material to be used & not the recycled material.</p> <p>3) Length – (i) 105 cm+ 1 cm, (ii) 100 cm+ 1 cm outer diameter – 24.5mm + 5mm</p> <p>4) Grip – Good quality material :- LLDPE, length minimum 18.5 cm.</p> <p>5) Thickness & shape as per sample available fitted with proper adhesive chemical.</p> <p>6) Material should be soft to bear reasonable impact shock to wrist when used.</p> <p>7) Nylon strap around the handgrip – Minimum 1" broad 2mm thick black nylon strap, which should be easily worn around the wrist for a firm grip, length of the strap 16".</p> <p>8) Protective cap: LLDPE material 4mm thick, 4 inches long, sealed at the external end.</p> | All Constabulary |

Appendix -1

GR No. UNF 0907/ C.R. 482/ Pol -4 dated 29th February, 2008

SPECIFICATION FOR SHOE OXFORD DIRECT MOULDED P.U. SOLE

1. Oxford leather Direct Moulded P.U. Sole Shoes in sizes 5 to 11 (English system) or in sizes 39 to 44 (French system).

1.1 The shoes should be made from Chrome tanned corrected grain leather upper, lined with cambrelle to absorb perspiration. The shoes are manufactured with elevated P.U. soles with anti slip design by Direct Injection Process.

2. STANDARD PATTERN

2.1 The standard pattern of shoes shall be oxford type with leather upper, Direct Moulded sole.

3. MATERIALS

3.1 The shoes shall be manufactured from the following materials :-

| | | | |
|------|---------------------------------------------------|---|----------------------------------------------------------------------------------------|
| i) | Leather chrome tanned for upper black (Buff/Cow) | - | The requirements are corrected grain for direct injection process given in Appendix-A1 |
| ii) | Cambrelle for lining | - | |
| iii) | Thread nylon | - | Nylon thread 3 ply having min. breaking strength of 3.5 kg. |
| iv) | Eyelets aluminum/brass, enamelled black for shoes | - | |
| v) | Laces nylon Min./70cm (min.) long for shoes | - | |
| vi) | Polyurethane sole | - | The requirements are given in appendix -A2 |

4. MANUFACTURE

4.1 The shoes shall be manufactured as described below :-

4.1.1 The shoes shall be made by direct injection process (DIP construction) using standard last having G/H-fitting.

4.1.2 Design

4.1.2.1 The shoes shall be Oxford type with stroble construction with Direct Moulded P.U. sole. A full tongue shall be completely lined.

4.1.2.1.1 Shape of Components.

4.1.2.1.2 The patterns of the quarters, outside counter, vamp lining, toe cap and toe puff shall be so designed that these do not form excessive pleats at "Toe" and "Counter" regions during lasting.

4.1.3 Cutting of Components

3.1.3.1 The various upper and bottom components of leather shall be cut from the material and to the thickness as prescribed in Appendix-A3. All components shall be free from serious grain damage, flay cuts and other defects. Care shall be taken that all parts, forming the upper are cut so that the lines of tightness of the leather is in the direction from heel to toe.

5. UPPER CLOSING

5.1.4.1 The upper shall be attached/closed on lock stitch machine using nylon thread for counters, back and tongue joint with vamp and for remaining position equivalent spun polyester thread can also be used for stitching in place of nylon thread. The number of stitches shall be 20 to 32 per decimeter. Care shall be taken to maintain the space and uniform tension of the stitching at all places.

5.1.4.2 The joined top of the quarters shall be carefully strengthened by means of leather strip from outside.

5.1.4.3 Two rows of stitching shall be used at the toecap and counter, and two rows at the sides.

- 5.1.4.4 The toe puff shall be stitched with second row of toecap stitching. All loose ends of the upper stitching shall be secured properly.
- 5.1.4.5 The full tongue shall be so fitted that no wrinkles/step occur where it is joined to the vamp.
- 5.1.4.6 Five eyelets shall be fitted in each quarter facing. The eyelet shall be clinched with washer, without distortion. The top eyelet shall be positioned at a distance of min. of 10mm from the top line of the quarter and rest shall be equally spaced.

5.1.5 Lasting

5.1.5.1 Pre moulding of toe and counter (thermoplastics) shall be done before lasting. Moulded upper shall be stitched by stroble cloth all around ensuring that there is no wrinkle in the stitching area. Care should be taken to match stroble stitching with upper knotches so that upper is straight.

5.1.5.2 The upper shall be properly laced upto the fourth eyelet before lasting so that the quarters remain in proper alignment on the instep.

5.1.5.3 In the lasting operation, the upper and the insole shall not be wetted or damped too much to show any water spotting or to make the grain pattern of upper leather disappear.

5.1.5.4 The Shoe shall remain on the last long enough to ensure proper shape of the upper and adequate setting of the shoe.

6. Requirement

6.1 The material used in the manufacture of shoes shall be tested to the specification/ requirements given in this specification.

6.2 The mass of one pair of finished shoes of size 8 shall not exceed 800g with an increase or decrease of 75g for each bigger or smaller size respectively.

6.3 Dimensions of Shoe will be as under :

The back height and depth of toecap for size 8 will be 70 ± 2 mm and 55 ± 5 mm. These dimensions will increase and decrease by 2 mm and 5 mm per size respectively.

6.4 The thickness of sole in the finished condition shall be as under :

| Sl. No. | Description | Thickness (mm) |
|---------|-------------------------------|----------------|
| 1. | At forepart | 7 (min.) |
| 2. | At waist | 6 (min.) |
| 3. | At heel | 20 (min.) |
| 4. | Depth of cleat at sole & heel | 2 (min) |

6.5 The Direct Molded Shoe shall be subjected to adhesion test. The testing shall be made at least 24 hours, after allowing the Shoe to cool down at room temperature. For accurate results it is recommended to test the sample after 24 hours.

6.6 Upper/outsole bond strength - The bond strength shall not be less than 3 N/mm unless there is fearing of the material.

6.7 The bond strength between the outer or cleat layer and the adjacent layer shall be not less than 3N/mm unless there is a tearing of the sole, in which case the bond strength shall be not less than 2.5 N/mm.

7. The socks of the Shoe shall be legibly stamped with the manufacturer's name or his recognized trade-mark, size and month & year of manufacture.

8. Hydrolysis Test-The sole shall be placed in High Humidity (100%) at a temperature of 72°C for 5 days and then tested for SATRA Bata sole flexing for 50,000 cycles. No crack or damage to the footwear is acceptable.

9. The shoes shall be delivered in new, dry and clean condition.

APPENDIX- A1

UPPER LEATHER

The requirements of upper leather are given below :

| Property | Test Method | Minimum Requirement |
|-----------------------------------------|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tear strength | ISO 377-1975 | Min. force 90 N |
| PH value | EN 344/ ISO 405-1977 | Min. 3.5, if below 4, the difference figure shall be 0.7 |
| Water vapour permeability & coefficient | EN 344 | Water vapour permeability shall not be less than 0.8 mg per cm ² per hour and the water vapour coefficient shall not be less than 20mg per cm ² . |
| Water penetration & absorption | EN 344 | The absorption shall not be higher than 50% after 30 minutes from the start. |

APPENDIX- A2 POLYURETHANE SOLE

| System | Polyester based |
|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Chemicals processing temperature (°C) | 40 to 45 |
| Mould temperature (°C) | 40 to 50 |
| Mould occupation time (minutes) | 2 to 2.5 |
| Moulded density (kg/m ³) | 400 to 600 |
| Tensile strength (DIN 53504, Mpa) | > 5 |
| Elongation at break (DIN 53504, %) | > 200 |
| Trouser tear strength (DIN 53507, kN/m) | > 2.0 |
| Flexing life test | 30,000 flexes, maximum widening of puncture, 6mm |
| Abrasion test, (DIN 53516) | Maximum loss 350 mm ³ |
| Values of properties after hydrolysis (higher temperature/humidity test - DIN 53508, 168 hours at 70°C and 100% R.H.) | The values for tensile strength & elongation at break must not drop below the 75% of values specified above. |

APPENDIX- A3 THICKNESS OF COMPONENTS

| Sl. No. | Components | Material | Thickness (mm) | |
|------------|--------------------------|----------------------------------|----------------|------|
| | | | Min | Max |
| 1 | 2 | 3 Chrome tanned upper leather | 4 | |
| 1 | Quarter | | 1.1 | 1.5 |
| 2 | Vamp | | 1.1 | 1.5 |
| 3 | Toe Cap | | 1.1 | 1.5 |
| 4 | Out side counter | | 1.1 | 1.5 |
| 5 | Full tongue | | 1.0 | 1.5 |
| 6 | Back strengthening piece | | 1.0 | 1.5 |
| 7 | Full insock | Buff split leather | 0.7 | 0.9 |
| 8 | Lining | Cambrelle lining | 0.7 | 0.9 |
| 9 | Insole | Stroble canvas | 1.2 | 1.5 |
| 10 | Counter Stiffener | Thermoplastic material | 1.0 | 1.3 |
| 11 | Toe puff | -do- | 0.60 | 0.80 |

Appendix -2

GR No. UNF 0907/ C.R. 482/ Pol -4 dated 29th February, 2008

Specifications of Boot Ankle Leather Black (DIP-PU)

- 1 Boot Ankle Leather Black made out of Directly Injected P.U. Sole in sizes 5 to 11 (English system) or in sizes 39 to 46 (European system).
- 1.1 "Boot Ankle Leather" covered by this specification is a two-piece design, with a toecap and counter. The design also caters for adequate ankle support. It also meets the requirement of wear comfort during long marches.
- 1.2 Galifornian / Strobel construction process should be adopted for lasting and the attachment of upper to the sole should be achieved with Direct Injection Process. The boots should be made with a bucket type of sole to avoid any ingress of water. Direct Injection Process for soling should be adopted to avoid stitching of soles to eliminate any ingress of water through stitch holes. The use of nails / screws is completely eliminated.
- 1.3 Made from Chrome tanned Zuggarain leather upper for Vamp, Quarters and 'Tongue', lined with Cambrelle to absorb perspiration or without lining depending on climatic conditions. Toe Cap and Counter are made out of Plain CG leather. The boots should be manufactured with cleated P.U. Soles and with anti slip design.
- 1.4 To give added comfort while undertaking long walks and marches, a layer of soft EVA rubber sheet should be provided under full leather socks.
- 1.5 A finished pair of boots weighs approx. 0.88 to 1.20 Kg. depending upon its size.

2. RELATED "BIS" SPECIFICATION

- 2.1 Reference is made in this specification to :
 - i.. IS:5041-1978-Footwear and stationary eyelet.
 - ii IS:5677-1986-Shoes upper leather for direct moulding process
 - III IS: 8086 (Pt I) 1986-Footwear method of test Pt I dimensions, fitting, adhesion, test etc.
 - iv. IND/TC/0304 - Laces nylon black for boots & Shoes.

3. STANDARD PATTERN

- 3.1 The standard pattern of Boot Ankle Leather Black (PIP-PU) shall constitute the standard with regard to appearance general workmanship, finish and any other particular/properties not noted/defined/determined in the specification.

4. MATERIALS

- 4.1 The boots shall be manufactured from the following materials.
 - i) Leather chrome tanned for upper for direct moulding process (a) Zuggrain for Vamp, Quarters and Tongue. (b) Buff CG Plain for Toe Cap and Counter.
 - ii) Cambrelle for Lining
 - iii) Thread nylon
 - iv) Eyelets aluminum, enameled black for boots
 - v) Laces nylon 90cm long for boots
 - vi) Polyurethane sole (required chemicals)

The requirements are give in Appendix-B1

Standard Quality Nylon or Spun Polyester thread 3 ply having min. breaking strength of 3.5. Kg.

IS: 5041-1978
IND/SS/1365
IND/TC/0304

Requirements as per Appendix- B2 to this specification.

5. MANUFACTURE

5.1 The boots shall be manufactured as described below:-

- 5.1.1.** The boots shall be made by direct injection process (DIP construction), using last model conforming to the dimensions of last model no. 9150 or 10883 or equivalent. Design of the boots shall be Derby type and conform to the design and shape as illustrated in the sketch attached to this specification. A full tongue shall be completely lined.
- 5.1.2.** The patterns of the quarters, outside counter, vamp lining, toe cap and toe puff shall be so designed that these do not form excessive pleats at 'Toe' and 'Counter' regions during lasting.

5.2 CUTTING OF COMPONENTS.

- 5.2.1** The various upper and bottom components of leather shall be cut from the material and to the thickness as prescribed in Appendix - B3. All components shall be free from serious grain damage, flay cuts and other defects. Care shall be taken that all parts, forming the upper are cut so that the lines of tightness of the leather are in the direction from heel to toe.

5.3 UPPER CLOSING

- 5.3.1** The upper shall be attached/closed on lock stitch machine using nylon thread for counters, back and tongue joint with vamp and for remaining position, equivalent spun polyester thread can also be used for stitching in place of nylon thread. The number of stitches shall be 20 to 32 per decimeter, care shall be taken to maintain the space and uniform tension of the stitching at all places.
- 5.3.2** The back seems of the quarters shall be taped with tape cotton. The joined top of the quarters shall be carefully strengthened by means of 25mm wide leather strip from outside.
- 5.3.3** The counter shall be turned over to within 13mm at the top so as to form a jug loop as illustrated in the relevant sketch attached.
- 5.3.4** Two rows of stitching, 3mm apart, shall be used at the toe cap and counter, and two rows 6mm apart, at the sides. the distance between the two rows for stitching at the facing of the quarters shall not exceed 2mm, the first row of stitches being 3mm from the edge of the quarter.
- 5.3.5** The toe puff shall be stitched with second row of toe cap, stitching. All loose ends of the upper stitching shall be secured properly.
- 5.3.6** The full tongue shall be so fitted that no wrinkles/step occurs where it is joined to the vamp.
- 5.3.7** Four or Five eyelet shall be fitted in each quarter facing. The eyelet shall be clinched with washer, without distortion. The top eyelet shall be positioned at a distance of 25mm from the top line of the quarter and rest shall be equally spaced.

5.4 LASTING

- 5.4.1** Pre-moulding of toe and counter (thermoplastics) shall be done before lasting. Molded upper shall be stitched by stroble cloth all around ensuring that there is no wrinkle in the stitching area. Care should be taken to match stroble stitching with upper notches so that upper is straight.
- 5.4.2** The upper shall be properly faced up-to the third eyelet before lasting so that the quarters remain in proper alignment on the instep.
- 5.4.3** In the lasting operation, the upper and the insole shall not be wetted or damped too much to show any water spotting or to make the grain pattern of upper leather disappear.
- 5.4.4** The boot shall remain on the last long enough to ensure proper shape of the upper and adequate hardening of the toe puff and the stiffener.

6. REQUIREMENT

- 6.1 The material used in the manufacture of boots shall be tested to the specifications/requirements given in this specification.
- 6.2 The mass of one pair of finished boots of size 8 shall not exceed 1100 gm with an increase or decrease of 100g for each bigger or smaller size respectively.
- 6.3 Dimensions of boot will be as under:
- | Size No. | Leg Height | Depth of toe cap |
|-----------------|-------------------|-------------------------|
| 5 to 7 | 144-25 | 72 |
| 8 to 10 | 152-25 | 77 |
| 11 to 13 | 160-25 | 82 |
| Tolerance | ± 2 | ± 1 |
- 6.4 The thickness of sole in the finished condition shall be as under:
- | Sl.No. | Description | Thickness (mm) |
|---------------|-------------------------------|-----------------------|
| 1. | At forepart | 16 (min) |
| 2. | At waist | 11 (min) |
| 3. | At heel | 25 (min) |
| 4. | Depth of cleat at sole & heel | 4 (min) |
- 6.5 Adhesion Test - The direct injected boot shall be subjected to adhesion test. The testing shall be made at least 24 hours, after allowing the boot to cool down at room temperature. For accurate results it is recommended to test the sample after 28 hours.
- 6.6 Upper/outsole bond strength - The bond strength shall not be less than 4 N unless there is tearing of the material. The bond strength between the outer or cleated layer and the adjacent layer shall be not less than 4N/mm unless there is a tearing of the sole, in which case the bond strength shall be not less than 3.0 N/mm.
- 6.7 Electrical Insulation - When measured in accordance with the method described in EN 344 after conditioning in a dry and wet atmosphere, the electrical resistance shall be not less than 100 K-and not greater than 1000M-
- 6.8 Heat insulation of sole complex - When footwear is tested in accordance with the method described in EN 344 the temperature increase on the upper surface of the insole shall be not greater than 22°C.
- 6.9 Cold insulation of sole complex - When footwear is tested in accordance with the method described in EN 344, the temperature decrease on the upper surface of the insole shall be not more than 10°C

7. MARKING

- 7.1 Each boot shall be legibly stamped with indelible ink/paint on the waist near manufacturer's marking using stamp.
- 7.2 The waist position of the finished boot shall be legibly stamped with the manufacturer's name or his recognized trade-mark, Cat No., size fitting and month/year of manufacture.
- 7.3 The size of the boot shall also be legibly and indelibly marked on the waist of outer sole and at the top surface of the tongue.

8. PACKING

- 8.1 The following materials shall be used for packaging of boot ankle leather made out of Directly Injected PU Sole
- Solid fiber board boxes
 - Polypropylene strapping 19mm x 0.55 mm (for solid fiber board boxes)
 - Tape paper gummed 50mm wide.
 - Paper wrapping waterproof plain (using craft paper having substance g/m²)
- 8.2 The boots shall be delivered in new, dry and clean condition.

APPENDIX-B1
UPPER LEATHER

The requirements of upper leather are given below :

| Property | Test Method | Minimum Requirement |
|-----------------------------------------|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tear Strength | ISO 377-1975 | Min. force 120 N |
| pH Value | EN 344/ISO 405-1977 | Min. 3.5, If below 4, the difference figure shall be 0.7 |
| Water vapour permeability & coefficient | EN 344 | Water vapour permeability shall not be less than 0.8 mg per cm ² per hour and the water Vapour coefficient shall not be less than 20 mg per cm ² |
| Water penetration & absorption | EN 344 | The absorption shall not be higher than 30% after 60 minutes from the start and water penetration shall not occur during this period, nor exceed 2 kg. after a further 30 minutes. |

APPENDIX-B2
POLYURETHANE SOLE

| System | Polyether based |
|-----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Chemicals processing temperature (°C) | 20 to 25 |
| Mould temperature (°C) | 40 to 50 |
| Mould occupation time (minutes) | 4 |
| Moulded density (kg/m ³) | 500 to 600 |
| Tensile strength (DIN 53504, Mpa) | 5.5 to 6.5 |
| Elongation at break (DIN 53504, %) | 380 to 410 |
| Trouser tear strength (DIN 53507, kN/m) | 12 to 14 |
| Ross flex test (cut growth in mm/1,000 cycles At - 5 °C At - 18 ° | 0.001 — |
| Flexing life test (DIN 53507) | 30,000 flexes, minimum widening of puncture, 6mm |
| Abrasion test, (DIN 53516) | Maximum loss 300 mg |
| Values of properties after hydrolysis (higher temperature/humidity test - DIN 53508, 168 hours at 70°C and 100% R.H.) | The values for tensile strength & elongation at break must not drop below the 85% of values specified above. |

APPENDIX-B3
THICKNESS OF COMPONENTS

| Sl. No. | Components | Material | Thickness (mm) | |
|------------|-------------------------------------------------|--------------------------------------------------------|----------------|-----|
| | | | Min | Max |
| 1 | 2 | 3 | 4 | |
| 1 | Quarter | | 1.8 | 2.5 |
| 2 | Vamp | | 1.5 | 1.8 |
| 3 | Toe Cap | | 1.2 | 1.8 |
| 4 | Out side counter with extended wing at jug loop | Chrome tanned upper leather | 1.2 | 1.8 |
| 5 | Full tongue | | 1.2 | 1.8 |
| 6 | Back strengthening piece | | 1.2 | 1.8 |
| 7 | Full insock | EVA Moulded with arch support covered by split leather | 0.8 | 1.0 |
| 8 | Lining | Lining leather or nylon cambrelle | 0.8 | 1.0 |
| 9 | Insole | Stroble canvas | 1.3 | 1.8 |
| 10 | Counter Stiffener | Thermoplastic material | 1.5 | 2.0 |
| 11 | Toe puff | | 1.5 | 2.0 |
| 12 | Heel grip | Split Suede leather | 1.0 | 1.2 |

Appendix - 3
GR No. UNF 0907/ C.R. 482/ Pol-4 dated 29th February, 2008

SPECIFICATION OF PATROLING SHOES

Patroling Shoes ~

MATERIALS

A) Upper Material ~ PU coated fabric / textile for main part of upper, Matching fabric mesh for collar, plug and parts of quarter foam inside collar and tongue

| | | |
|----|----------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Mud guard | 1. 2 to 1.6 mm P.U. synthetic |
| 2 | Eyestay | -do- |
| 3 | Quarter | -do- |
| 4 | Counter | -do- |
| 5 | Collar | -do- |
| 6 | Tongue | Olive green cordura with 4 mm lamination |
| 7 | Vamp | -do- |
| 8 | Quarter deco & Collar | -do- |
| 9 | Foam Collar | Minimum 12mm PU foam |
| 10 | Tongue Foam | Minimum 5mm PU foam |
| 11 | Upper Thread | 3 & 6 ply green breaking load more than 3.5 kg |
| 12 | Colour of the Shoe | As per the indent sample available in D-18 |
| | Eyelets | No 200 brass (12 pieces per pair) 3 eyelets |
| | D-ring | Antique brass colour with female |
| | Reinforcement | a. Nylon tape – minimum 12mm black / olive b. Binding tape- minimum 2 mm black/ olive c. Reinforcement tape- minimum 12 mm under zigzag d. Intake tape- minimum 12 mm black/ olive |
| | Lining Materials – Quarter lining and tongue lining of mesh looking fabric (Skin fit) | |
| 1 | Vamp lining | 0.8mm + 0.1mm olive green skin fit |
| 2 | Tongue lining | -do- |
| 3 | Quarter lining | -do- |
| | Insock ~ Spongy polymer, fabric surface towards foot | |
| | Socks full | Skin fit with minimum 2.5 mm EVA laminated |
| | Lacing | 110-115 cm of breaking load more than 50 kg –Lace 3-4 mm diameter, matching colour 4 pairs of D-Rings per pair of shoe, metallic look 3 pairs of eyelets per shoe, antique Fabric tape on the tongue, end looped for lacing to go through |
| | Counter Stiffener | Thermoplastic material – Head activated –1.2 + 0.1mm thick |
| | Sole | |
| | Direct injected PU sole | Polyester polyurethane density minimum 0.55-55g /cc |
| | Sole thread – 6ply black | Breaking load more than 7 kg |
| | Stroble thread | 2 ply normal |
| | Insole | |
| | Woven cloth | 1.8 ± 0.2 mm thick |

| REQUIREMENTS | |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Shape & Design | |
| Laced design of boot upper | With tongue and plug Two colour look, general appearance of greenish brown Nordic forest look Visible part of lining is matching the upper |
| Soling pattern | The soling shall not include continuous lateral tread pattern for any other features, such as sharp corners at the base of the sole pattern, which may accelerate or cause premature crack formation. 2. The design should be such that the sole will have adequate skid resistance with cleat height of minimum 5mm. 3. The sole should be of bucket type with wall height more than 20mm at toe and more than 30 mm at heel. The sole will be formed by direct injection process on the lasted upper. |
| Hardness | The hardness shall be 50-60 shore A/IRHD |
| Relative density of soling material | The relative density of the material after moulding shall be between 0.50 to 0.55gm/ cc |
| Bond-strength | |
| Upper / out sole bond strength | The bond strength when tested as per IS 15298 shall not be less than 3 N unless there is tearing of the material in which case the tearing strength shall not be less than 2N /mm. |
| Abrasion Resistance of sole | When tested as per specification IS 15298 the maximum volume loss shall not be more than 250 mm. |
| Hydrolysis test | The Boots shall be placed in High Humidity (100%) at a temperature 72 C for 5 days and then tested for whole shoe flexing for 100,000 cycles. No crack or damage to the footwear is acceptable. |
| Electrical Insulation | When measured in accordance with the method described in IS 15298 after conditioning in a dry and wet atmosphere, the electrical resistance shall be not less than 100 kΩ and not greater than 1000 MΩ. |
| Heat insulation of sole complex | When footwear is tested in accordance with the method described in IS 15298, the temperature increase on the upper surface of the insole shall be not greater than 22 °C |
| Cold Insulation of sole complex | When footwear is tested in accordance with the method described in IS 15298, the temperature decrease on the upper surface of the insole shall be not more than 10 °C |
| Leg height | The height of boots shall be as agreed to between the purchaser and the supplier. The height shall be measured on inside at the back of the boots from the insole to the top including any flexible extension. |
| Recommended Back Height | 110 ± 10 mm for size 07 Height of other size shall vary accordingly |
| Sampling and criteria for conformity | The method of sampling, drawing representative sample of the boots and the criteria for conformity shall be as prescribed in IS 6368: 1971. |
